WHAT'S YOUR PLAN?

Right now, the future might feel uncertain. COVID-19 has caused the biggest disruption to the global job market in recent history, and its impact has fast-tracked changes that are transforming the world of work.

In the coming years, digitalisation, automation and AI will continue to profoundly reshape the workplace. Many jobs that exist today will no longer be options by the time you finish your education. New jobs will emerge, while others will evolve as technology replaces the more routine aspects of many occupations.

This new reality may seem daunting, but brings with it smarter ways of working and exciting opportunities to network, collaborate and flourish in a world full of diverse new jobs. It is an unpredictable time to be embarking on a career, but if you plan effectively, you'll be well prepared to harness the opportunities that come your way. This planning begins with some strategic thinking and decision making.

You need to decide if you want to complete Years 11 and 12, or pursue other training or employment. You need to think about whether you want to undertake further study and if so, what you might study, and where. You need to take the first step down one path, but you should begin the journey knowing that there could be roadblocks or detours, and that you might need to retrace your steps and go back the way you came once or twice.

This plan is the starting point for a hundred different decisions that you are going to make in the next decade. You can change your mind — and you probably will, more than once — and that's okay.

For now, you just need a place to start.

To be able to achieve your goals, you need to start with a simple plan. Put it down on paper. Be flexible enough to change the plan as you move along, and never stop asking yourself what inspires you, what brings you joy, and how you are going to change your world.

CAREER PLANNING RESOURCES

If you're unsure where to start, the following resources can help you take the first steps in planning your career.

myfuture.edu.au

Myfuture is a comprehensive career information and exploration service. It can help you explore career options based on your skills and interests, find information about occupations, and the further education and training required for each job.

joboutlook.gov.au

Job Outlook is an Australian Government website providing information about Australian careers, labour market trends and employment projections. Covering about 350 individual occupations, it also includes an interactive career quiz that helps identify work styles and suggests career options.

myskills.gov.au

My Skills provides information about vocational education and training. It can connect you with employers and training organisations that best suit your needs and the path that you have set out.

studyassist.gov.au

If you are thinking about tertiary study, this website contains information about the Australian Government's financial assistance.

aapathways.com.au

Australian Apprenticeships Pathways lets you find out where apprenticeships are available, and provides links to job pathways charts and job descriptions (refer also to the Queensland Training Information Service and Queensland Skills Gateway).

CAREER AND EMPLOYMENT EXPOS

Career and employment expos (also known as career markets or fairs) connect job seekers and students with industries, employers, and education and training providers. Attending a career and employment expo offers great opportunities to speak face-to-face with people who can answer your questions and guide you on your professional path.

Visit qtac.edu.au/open-days-expos for 2024 career and employment expo dates and locations.

CAREER PATHWAYS

Many career pathways are available to you after you finish high school, and some can even give you a headstart on your career while you're still at school. The right pathway for you depends on your interests, career aspirations and personal learning style. Here are some of the opportunities on offer.

UNIVERSITY

Many jobs need a university degree (for example, engineer, teacher or paramedic), but aside from getting a qualification, going to university has other benefits.

Benefits of university

Whatever job you want in future, a degree could help your chances of earning a good income throughout your life. With a degree, you are also more likely to find work that is challenging and interesting.

University teaches you how to be an independent thinker. At the end of your time at university, you still won't know all the answers, but you will ask better questions. It's a time where you can question everything, and you will be surrounded by people who are also seeking better answers to the problems faced by the world.

University is a place to meet new people and experience new things. You will mix with students from all around the world, and it is easy to find your tribe. The friends you make at university will be your future network of colleagues and connections.

Universities are great places for entrepreneurs. If you want to be the next big thing, you will have opportunities to find like-minded students, be guided by industry experts, participate in competitions and apply for grants, and have the resources at your disposal to explore your ideas.

VOCATIONAL EDUCATION AND TRAINING

Vocational Education and Training (VET) focuses on providing practical skills for work. Apprenticeships, traineeships and TAFE certificates and diplomas are all examples of VET. Unlike university courses that often involve large amounts of theory, VET or TAFE courses are designed to prepare you for work. If you prefer practical, hands-on learning over sitting in a classroom, then a TAFE course could be right for you.

Benefits of TAFE

Studying at TAFE can help you get into the workforce sooner. Many certificate courses can be completed in as little as six months, while diploma qualifications usually take 12 — 18 months, compared to three years for a university degree. Because TAFE training focuses on giving you practical, work-ready skills, studying at TAFE increases your chances of finding work after you graduate. Nearly 80% of TAFE Queensland graduates secure employment after successfully completing their course. Visit tafeqld.edu.au for more information.

TAFE at school

You may be able to complete a TAFE Queensland qualification while you're still at school, through the TAFE at School program. TAFE at School courses are available to Year 10, 11 and 12 students and work in with your existing high school studies. They can also count towards your Queensland Certificate of Education (QCE).

CAREER PATHWAYS

This allows you to get a TAFE qualification while you complete your high school studies. A qualification can help you stand out from the crowd, and give you a competitive edge in the job market. Learn more about TAFE at School at tafeqld.edu.au/courses/ways-to-study/tafe-at-school.

APPRENTICESHIPS AND TRAINEESHIPS

Apprenticeships and traineeships let you work for an employer and earn a wage while you complete a qualification. Apprenticeships are generally in skilled trade areas such as electrical, plumbing or automotive and can take up to four years to complete.

Traineeships are often in vocational areas such as business, IT and tourism and can take between 12 months and three years to complete. For more information, visit desbt.qld.gov.au/training/apprentices.

SCHOOL-BASED APPRENTICESHIPS AND TRAINEESHIPS

If the idea of combining school and work sounds appealing, a school-based apprenticeship or traineeship could be right for you. You will develop industry-relevant skills to set you up for your future career while you complete your high school studies. You need approval from your school to complete a school-based apprenticeship or traineeship. Your school, employer and training organisation will then work together to create your training schedule, with some of your paid employment and/or training becoming part of your school timetable.

A wide variety of industries offer apprenticeship and traineeship training. You can choose from a range of traditional trade areas including automotive, bricklaying, carpentry, electrotechnology, engineering, plumbing and refrigeration, or get the practical skills you need to start a career in aged care, agriculture and horticulture, allied health, beauty and hairdressing, business, community services, child care, hospitality and cookery, information technology, retail, or tourism and events. Visit desbt.qld.gov.au/training/apprentices/sats for more information.

AUSTRALIAN DEFENCE FORCE

As well as defending the nation, the Australian Defence Force (ADF) supports a broad range of peacetime operations in Australia and overseas. Whether it is the navy, army, air force or reserves you are interested in, there is a great variety of opportunities to work, study or even take a gap year with the ADF. Find your ideal role in the ADF at defence.gov.au.

Australian Defence Force Academy

The Australian Defence Force Academy (ADFA) is a military institution that combines military education and training with academic study for an undergraduate degree. ADFA provides the opportunity for you to undertake a program of military and leadership training while studying and receiving a salary.

The training and education provides you with the foundation knowledge, skills, professional abilities and character qualities necessary to become an officer in the ADF. On graduation, midshipmen and officer cadets become permanent full-time members of the ADF. For more information, visit defence.gov.au/ADFA.

EMPLOYMENT

Not everyone wants to do further study straight after they finish high school. If you're keen to start earning an income, there are plenty of resources that can help you find that first job. The Queensland Government website, for instance, can assist you in finding job vacancies (including using social media), writing your resume and cover letter, and preparing for interviews. Find out more at qld.gov.au/jobs.

ALL ABOUT YOUR ATAR

WHAT IS THE ATAR?

The Australian Tertiary Admission Rank (ATAR) is the standard measure of a student's overall academic achievement in relation to that of other students. It is intended to help tertiary institutions select applicants for their courses. The ATAR is a percentile rank, not a score, and indicates a student's position relative to other students in their cohort in a given year.

ATARs are expressed as a number on a 2000-point scale from 99.95 (highest) down to 0.00, in increments of 0.05. So, if you get an ATAR of 80.00, it does not mean you achieved 80%. It indicates that you placed in the top 20% of students in Queensland in your Year 12 age group. ATARs below 30 are reported as '30.00 or less'.

ATAR ELIGIBILITY

To be eligible for a Queensland ATAR, you must:

- Satisfactorily complete (i.e. achieve a minimum grade of C or higher) an English subject (Unit 3, Unit 4); English, English as an Additional Language, English and Literature Extension, Literature, or Essential English
- Complete one of the three following combinations:
 - five General subjects (at Units 3 and 4 level),
 - four General subjects (at Units 3 and 4 level) plus one Applied subject (at Units 3 and 4 level),
 - four General subjects AND a completed VET qualification at the Australian Qualification Framework (AQF) Certificate III level or higher.
- Accumulate your results within a five-year period.

English subject requirement

While you must satisfactorily complete an English subject to be eligible for an ATAR, your English result will only be included in your ATAR calculation if it is one of your best five scaled results.

To satisfactorily complete a subject, you must attain a letter grade of 'C' or better.

Accumulated and Accelerated results

Your ATAR is based on the aggregate of scaled results in your best five eligible subjects, irrespective of the year in which the subjects are completed.

Most students are expected to follow a traditional pattern of accumulating their results over two years of study in Years 11 and 12, with results at Units 3 and 4 achieved over the one year (Year 12). To cater for students who are unable to undertake five subjects in one year, ATARs can be calculated based on results achieved over five consecutive years. Completing one eligible subject each year over a five-year period should qualify you for an ATAR.

PRECLUDED SUBJECTS AND SUBJECT COMBINATIONS

The following rules apply to precluded subjects and subject combinations for ATAR eligibility:

- Only General English subjects or Applied English subjects can be included in the ATAR, but not both. For example, it is not possible to include both English (a General subject) and Essential English (an Applied subject) in your ATAR.
- Only General Mathematics subjects or Applied Mathematics subjects can be included in the ATAR, but not both. For example, it is not possible to include both Mathematical Methods (a General subject) and Essential Mathematics (an Applied subject) in your ATAR.
- Only one result for the same subject taken as a General subject and Senior External Examination can be included in the ATAR. For example, it is not possible to include both the General subject Chinese and the Senior External Examination subject Chinese in your ATAR. Similarly, it is not possible to include both the General subject Biology and the Senior External Examination subject Biology in your ATAR.

No other restrictions apply to the inclusion of subjects in the ATAR. For example, the following General subject results can be counted in your ATAR:

- both English and Literature,
- both Mathematical Methods and Specialist Mathematics,
- both Chinese and Chinese Extension,
- both Italian and Spanish.

Remember, some university courses have subject prerequisites you must meet before you can be considered for entry, so if you have a tertiary course in mind, consider this when choosing your subjects.

ALL ABOUT YOUR ATAR

HOW IS THE ATAR CALCULATED?

The ATAR is calculated in three steps:

1. The Queensland Curriculum and Assessment Authority (QCAA) provides your Unit 3 and 4 subject results in General and Applied subjects and completed VET qualifications to QTAC. Note: Only completed VET qualifications listed in your QCAA student learning account will be sent to QTAC. To check and keep track of your account, visit myqce.qcaa.qld.edu.au.
2. QTAC scales these subject results and VET qualifications. This produces scaled results.
3. ATARs are then allocated to students based on the total (aggregate) of their best five scaled results. For information on scaling and calculating ATARs from scaled results, visit qtac.edu.au/atar.

ATARS AND ADJUSTMENT FACTORS

Adjustment factors are only indicated on a QTAC application. When your QTAC application is assessed, adjustment factors are added to your selection rank after ATARs are calculated, according to individual institution rules.

Adjustments may be applied for factors such as performance in certain Year 12 and university subjects, living or attending school in a certain location, and consideration through QTAC's Educational Access Scheme.

Adjustment factors are applied differently from institution to institution and from course to course. Visit each institution's website for more details.

VET QUALIFICATIONS FOR TERTIARY ENTRY

Completed Vocational Education and Training (VET) courses can be used for tertiary entry in two ways:

- VET included in the ATAR; and/or,
- VET as a standalone basis of admission.

How is VET incorporated into the ATAR calculation?

VET qualification levels that count towards ATAR eligibility are completed Certificate III, Certificate IV, Diploma and Advanced Diplomas. Certificate I or Certificate II level qualifications cannot be included. Each VET qualification level has a single scaled result that can be included in the ATAR calculation for a student. That scaled result in any one year is the same regardless of the field of study, duration or content of

the VET qualification. For example, a Certificate III in Hospitality and a Certificate III in Lab Skills will have the same scaled result.

VET AS A STANDALONE BASIS OF ADMISSION

Institutions may consider completed VET qualifications at Certificate III level and higher on their own as a basis for tertiary admission. Visit qtac.edu.au/atar for more information about institutions and VET qualifications as a basis of admission to tertiary study.

PERFORMING ARTS QUALIFICATIONS FOR TERTIARY ENTRY

Performing arts qualifications such as AMEB awards are not included in the ATAR calculation. However, some institutions may consider these qualifications on their own as a basis of admission to tertiary study.

Visit qtac.edu.au/applications for more information about institutions and performing arts qualifications as a basis of admission to tertiary study.

HOW TO GET YOUR ATAR

ATARs are released to Year 12s online through the QTAC ATAR portal in December. Registrations for the ATAR portal open to current Year 12s with the opening of QTAC applications in August each year.

For specific questions about the ATAR, call the ATAR hotline on **1300 193 173** or email atar@qtac.edu.au.

ATAR Timeline

- QCAA collects Units 3 and 4 subject results and completed VET qualifications,
- QTAC receives results from QCAA,
- QTAC scales results,
- QTAC calculates ATARs from the best five scaled results aggregate for each student,
- ATARs released via online portal.

SUBJECT CHOICE EXAMPLES

JOSEPH

- Specialist Mathematics (Units 3 and 4) (General),
- Mathematical Methods (Units 3 and 4) (General),
- English (Units 3 and 4) (General),
- Physics (Units 3 and 4) (General),
- Chemistry (Units 3 and 4) (General).

If Joseph successfully completes English, he will be eligible for an ATAR because he has studied five General subjects at Units 3 and 4.

CELINE

- General Mathematics (Units 3 and 4) (General),
- English (Units 3 and 4) (General),
- Drama (Units 3 and 4) (General),
- Religion and Ethics (Units 3 and 4) (Applied),
- Information and Communication Technology Skills (Units 3 and 4) (Applied),
- AQF Certificate III in Business (completed) (VET).

Celine is not yet eligible for an ATAR because she has only three General subjects. Next year, she could study a fourth General subject and be eligible for an ATAR, if she successfully completes English.

WHY IT'S IMPORTANT TO CHOOSE SUBJECTS YOU ENJOY!

BILLY

Billy is a talented musician who has always enjoyed performing and studying Music at school. Billy's love and passion for music made it easy to achieve a raw score of 95.00, which scaled to 88.95.

Billy also studied Chemistry, thinking it would gain a higher ATAR, but didn't enjoy it as much as Music. He found it hard to achieve high results in Chemistry and had to work extra hard to achieve a raw score of 67.00, which scaled to 73.97.

Billy studied Mathematical Methods to be in the same class as Lewis - Billy's best friend. Mathematics was never a strong suit for Billy, and he found it difficult to pass exams. Billy achieved a raw score of 57.00, which scaled to 77.12.

Billy likely would have achieved a better ATAR by choosing subjects he was naturally good at, like Music.

JO

Jo is a naturally creative student with a passion for the arts and always achieved excellent results in Visual Art, easily attaining a raw score of 98.00, which scaled to 90.78.

Jo's older brother studied Physics and did well, leading Jo to pick this subject too. Jo was not interested in Physics and found the subject difficult to grasp. Jo worked very hard to achieve a raw score of 67.00 which scaled to 72.68.

As Leonardo Da Vinci was Jo's artistic inspiration, Jo chose to study Italian. Learning a new language did not come naturally to Jo, who found it hard to keep up with the class. With much stress, Jo achieved a raw score of 69.00, which scaled to 75.46.

Jo likely would have achieved a higher ATAR by choosing subjects they were interested in.

STUDY AREAS

Find out what work you could do if you study in the following areas (entry requirements for courses are listed from Page 29 onwards):

- Built environment and design
- Business and tourism
- Creative and performing arts
- Education
- Engineering and technology
- Health and recreation
- Humanities and social sciences
- Information technology
- Law
- Primary industries and environment
- Sciences.

BUILT ENVIRONMENT AND DESIGN

Architecture

- Design buildings and other structures, and prepare drawings including safety regulations, legal requirements, building materials and interior fittings
- Meet with builders, clients and planning authorities, send out contracts and coordinate construction
- Produce drawings from an architect's sketch plans.

Building Surveying and Inspecting

- Enforce building and construction laws and regulations
- Inspect buildings to ensure safety standards, building regulations and codes of practice are being met, issue building permits, and advise on building matters.

Construction

- Work out material and labour costs, and completion dates
- Inspect building sites and supervise a construction site's progress
- Design buildings and manage construction
- Organise construction process and building development activities
- Manage building construction by having an understanding of building technology and construction management, economics, law and the use of specialist workers.

Geographic Information Systems (GIS)

- Create geographically referenced data layers for land use planning, mapping, surveying, transportation and infrastructure planning, and real estate analysis.

Industrial Design

- Design objects for personal and commercial use that are reliable, safe and comfortable to use
- Analyse a product's demand.

Interior Design

- Design a building interior, exhibition or commercial display layout and furnishing

- Organise material supplies, provide cost estimates, inspect work progress and maintain time and quality controls on site.

Landscape Architecture

- Apply ecological planning and design principles to improve an external space's appearance
- Work on projects such as planning urban plazas, parks and recreation centres, highways and streetscapes, mined land, coastal planning and heritage.

Property Economics

- Manage property assets, including property development, sale, valuation and management.

Quantity Surveying

- Monitor building projects from design through to completion
- Work out material, labour, equipment costs for tender documents and determine payment progress.

Urban, Regional and Town Planning

- Develop land-use plans that ensure spaces are healthy
- Interact with governments, developers and community groups to manage urban and rural areas.

BUSINESS AND TOURISM

Business and Commerce

- Set up, position and operate camera equipment in film and television studios or on location.

Cinematography

- Direct camera and lighting crews working on films and make artistic and technical decisions about the images.

Creative Writing

- Study expressive writing including popular fiction, contemporary writing, and culturally specific writing styles
- Write poetry, novels, short stories, biographies, plays, and scripts for film, radio, television and other electronic media.

Dance

- Study a variety of performance styles
- Learn theory for work in dance companies, freelance choreography, dance research, teaching, dance therapy and community dance work.

Design

- Use visual arts knowledge to produce creative designs
- Create designs by expressing individual thoughts and feelings.

Drama And Theatre

- Work as a drama teacher, arts administrator, playwright, director, stage manager, stage designer, drama therapist, community arts officer, actor or theatre technician.

Fashion Design

- Create and develop original designs, make patterns and select materials and colours to be used for garments and accessories
- Coordinate the manufacture of garments.

Film, Screen And Media

- Develop skills in creative disciplines of popular media such as animation, film and television production, photography or screen production.

Games Design

- Understand the structures and systems that are used in games development for multiple end formats
- Use digital technologies to study programming, game design and philosophies, animation, modelling, motion capture, sound and narrative.

Graphic Design

- Design artwork and publications, including digital and multimedia artwork, signage, packaging, exhibitions and corporate identity.

Illustrating

- Create drawings and designs for advertisements, magazines, books, newspapers, multimedia, film, television, scientific publications and websites.

Interior Design

- Plan and design the interiors of living spaces
- Advise on structural alterations to building interiors, and coordinate the implementation of designs from start to finish.

Lighting

- Control lighting equipment in studios or on sets during stage performances, television programs or film productions.

Multimedia

- Learn the computer imaging/graphics that influence the design of computer software, image creation and sound production
- Create graphic images, sound, text and videos for multimedia programs.

Music

- Specialise in performance, composition, music technology/production and music therapy.

Photography And Photo Imaging

- Use camera and lighting equipment to record images.

Photojournalism

- Take photos for stories and news.

Production

- Oversee the production of radio, film, television and theatre shows.

Scriptwriting

- Write screenplays for films, television programs, video games or multimedia.

Sound Engineering

- Operate technical equipment to amplify, mix, record, enhance or reproduce sound for performing arts and artists.

Textile Design

- Create fabric designs and patterns using digital processes, screen printing, embroidery and weaving.

Three-Dimensional Design

- Design sign systems, furniture, exhibitions for commercial purposes, lighting, packaging and the environment.

Visual/Fine Art

- Specialise in carving, ceramics, drawing, gold and silver smithing, illustration, multimedia, painting, printmaking or sculpture.

EDUCATION

Early Childhood Education

- Specialise in early childhood studies or in childcare centres, preschools and family day care.

Teaching

- Teach all levels of education including primary, secondary, special education and tertiary
- Undertake in-depth study of specialist secondary education topics.

ENGINEERING AND TECHNOLOGY

Aeronautical And Aerospace Engineering

- Design and develop aircraft and satellite systems
- Maintain flight vehicles, communication systems and space systems, while exercising strict safety and environmental controls.

Agricultural Engineering

- Develop agricultural production systems, conserve and manage soil, water and forest resources, minimise agriculture's environmental impact and improve the quality of primary products.

Biomedical Engineering

- Apply engineering to medicine and life sciences, such as cell and tissue engineering, metabolic, medical imaging and instrumentation
- Use technology to collect, organise and analyse biological data.

Chemical Engineering

- Design and manage industrial processes in which materials undergo physical, chemical or biochemical changes.

Civil Engineering

- Plan and maintain structures such as large buildings, roads, bridges, tunnels, railways, airports or sewerage systems.

Coastal Engineering

- Combine aspects of civil engineering, oceanography and marine geology to combat coastal erosion and manage coastal zones.

Computer Systems Engineering

- Develop computer technology, such as microprocessors, machine-level programming, computers and communication networks.

Electrical Engineering

- Maintain systems that generate and distribute electricity, such as generators, power stations, appliances and signalling devices.

Electronic Systems Engineering

- Develop electronic communication networks, computer systems and processing, industrial electronics and navigation systems.

Environmental Engineering

- Manage projects associated with pollution and waste engineering, particularly liquid and solid wastes, and air and noise pollution
- Develop technologies to minimise the environmental impact of engineering projects and conserve the use of natural resources.

Instrumentation And Control Engineering

- Install and maintain physical and chemical control system equipment.

Manufacturing And Materials Engineering

- Learn how to use and make metals and materials including ceramics and plastics, and design new products using new materials
- Research and develop new methods for processing, shaping, improving and making materials.

Marine Surveying

- Inspect cargo, ships and equipment, and investigate marine accidents for shipping companies, insurance organisations and other maritime-related industries.

Maritime/Marine Engineering

- Install, operate and maintain machinery on board ships and on off-shore systems, ensuring engines and ship-related machinery are operating efficiently.
- Record and analyse data from engine room instruments.
- Understand computer-controlled processes in automatic control systems.

Mechanical Engineering

- Operate machines for transport, manufacturing, refrigeration, aviation, air conditioning and electric power sectors.
- Coordinate production plants and factory production.

Mechatronic Engineering

- Design and create machinery that integrates with electronics and computer control
- Use cutting-edge technologies in applications such as intelligent machines, smart devices and robotics.

Medical Engineering

- Design and assess medical, surgical, rehabilitation and sports equipment, and provide specialist advice to medical staff.

Microelectronic Engineering

- Develop electronic chips, circuits, microcomputerbased products and systems, computers and related systems
- Create intelligent artefacts.

Minerals Process Engineering

- Research new technologies and techniques to produce

refined metals and minerals from crude ores using environmentally acceptable methods

- Design and develop the entire production process and coordinate operation.

Mining Engineering

- Survey ore deposits, evaluate their worth, study their overall structure and assess the most economical and safe methods for extracting the ore
- Design the installations required and supervise the construction and operation of mining enterprises.

Naval Architecture And Engineering

- Design and maintain boats and floating structures
- Develop a ship's design and specify the building materials required.

Ocean Engineering

- Design off-shore structures by using knowledge of physical processes in the oceans and their effect on constructed marine systems
- Research and develop systems and technologies that withstand, without negatively affecting, the natural environment.

Renewable Energy Engineering

- Research renewable natural resources including solar, rain, wind, hydro, tidal and geothermal heat
- Design and implement renewable energy technology.

Software Engineering

- Develop and maintain high quality software and large software systems such as business systems, management tools, office software.

Surveying

- Collect, assess and report on particular land and geographic information.

Telecommunications Engineering

- Design and monitor telecommunications networks and broadcast equipment such as satellite, telephone, optical fibres and computer systems.

HEALTH AND RECREATION

Aged Care

- Help the elderly maintain wellbeing, attend to injuries or illness, and find suitable accommodation.

Beauty Therapy

- Use knowledge of anatomy, physiology, skin disorders, cosmetic chemistry, health and nutrition to perform treatments, analyse skin and body problems, and give advice on treatments.

Biomedical Science

- Focus on the biological aspects of medical science and find jobs in applied health sciences or research.

Chiropractic

- Diagnose, treat, rehabilitate and prevent pain and disability of the spine and extremities.

Dental Hygiene

- Undertake a range of duties including teeth cleaning and scaling, and education in oral health care and hygiene.

Dental Technology

- Construct and repair dental appliances such as dentures, crowns and bridges.

Dental Therapy

- Provide a range of oral health services to schoolchildren in government dental clinics and the broader community.

Dentistry

- Treat oral diseases, injuries and abnormalities of the mouth, including operations such as fillings and crowns, and provide preventive oral health care education.

Dietetics

- Apply specialist scientific knowledge in food and nutrition, dietary design and management of food services to help both the sick and the healthy community.

Environmental Health

- Promote safe hygiene, health and good environmental practices, investigate food complaints, monitor pollution levels and develop community support systems.

Exercise Science

- Assess, prescribe and evaluate exercise to improve overall and specific body functions.

Fitness

- Work with allied health staff in fitness facilities such as gyms and aquatic centres.

Health Information

- Organise and administer health information systems in hospitals and health services.

Health Promotion And Health Education

- Work with community services, educators and governments to improve public awareness of health related issues.

Health Services

- Coordinate activities that provide health services, and seek to improve services, facilities and funding arrangements in the health industry.

Indigenous Health

- Plan and manage programs that meet the health needs of Indigenous Australian communities
- Understand the interaction between Indigenous cultures and public health strategies, with an emphasis on health promotion and health care.

Massage Therapy

- Improve the functioning of joints and muscles, and relieve mental and physical fatigue, treat soft tissue dysfunction, alleviate pain and enhance movement and function.

Medical Laboratory Techniques

- Work with doctors, scientists and laboratory assistants

to conduct laboratory tests that diagnose and treat diseases and disorders.

Medical Radiation Technology

- Use medical imaging technology or radiotherapy technology that helps diagnose and manage disease and injury.

Medicine And Surgery

- Examine, diagnose and treat injuries, diseases and other health complaints, and prescribe medications and treatment to promote or restore good health.

Midwifery

- Work with women through pregnancy, labour, childbirth and the postnatal period.

Musculoskeletal Therapy

- Address skeletal and muscular conditions through a range of measures such as exercise, diet, nutrition and posture.

Naturopathy

- Restore and maintain patient health by emphasising nature's inherent self-healing process via education and use of natural therapeutics.

Nursing

- Help individuals to achieve optimal health, cope with ill health and maintain their place in society.

Nutrition

- Advise clients on the relationship between diet and health at both individual and group levels to foster healthy lifestyles.

Occupational Health And Safety

- Identify hazards, assess risks, and design and implement emergency procedures, safety manuals, safe workplace practices and first aid.

Occupational Therapy

- Work with clients to overcome injury or illness, psychological or emotional difficulties, the effects of ageing or other limitations on everyday activities.

Optometry

- Examine eyes, diagnose visual and other eye problems, treat eye diseases and abnormalities, and prescribe lenses, other optical aids or therapy.

Osteopathy

- Address the underlying structural imbalances that can lead to discomfort and pain, and which limit healing from disease and injury.

Paramedic Science

- Provide pre-hospital intensive and emergency care, while working in teams alongside other emergency services personnel such as fire fighters and police.

Pedorthics

- Improve human movement, in particular gait and foot function

- Conduct assessments and manufacture corrective footwear, orthoses or other supportive devices to address feet and mobility.

Pharmacy

- Advise on medication's best use, distribution and storage
- Prepare medication, give advice about health, research and develop medicines, advise on government controls and regulations regarding medication supply and manufacture.

Physiotherapy

- Help people who have physical disorders, pain or function loss because of injury, disease or other medical conditions.

Podiatry

- Educate the community on the prevention, diagnosis and treatment of foot and lower limb disorders, injuries and disease.

Public Health

- Study general health and community wellbeing promotions
- Be involved in immunisation campaigns and education programs on issues including road safety, substance abuse, disease prevention, hygiene, food safety and obesity.

Recreation Management

- Specialise in sports coaching, recreation management or fitness
- Emphasise the importance of sport and leisure to business, communication and human relations.

Speech Pathology

- Treat people who have communication disorders with their voice, fluency, hearing, speech and language or who have oral functioning difficulties such as eating or swallowing.

Sport Development

- Develop and promote health, fitness, sport and recreation activities throughout the community
- Study basic sport and exercise science and extend this to sports marketing and management, physical activity promotion, sports psychology, nutrition and sport coaching.

HUMANITIES AND SOCIAL SCIENCES

Art History

- Review visual arts, sculpture and architecture in specific periods, with attention to the historical development of individual artists, techniques and trends.

Classics And Ancient History

- Study history and civilisation of ancient Greece, Rome, other Mediterranean cultures and the ancient Near East.

Communication Studies

- Review human communication theories at the interpersonal, organisational and mass communication levels and communication skills development.

English Studies

- Specialise in literature, cultural studies and communication, linguistics, writing, medieval and renaissance studies.

Film And Media Studies

- Understand literature and the mass media from a social, political and historical point of view.

History

- Study continuity and change over time including special areas such as modern history and international relations.

Journalism

- Focus on journalistic techniques, understand the history and press development, and prepare for a range of media including print, radio, film and television.

Languages And Linguistics

- Specialise in one or more languages, or study the science of language.

Media Production

- Gain hands-on experience in radio, film and video production.

Organisational Communication

- Work with organisations to improve communication practices, manage change, plan communication strategies, and produce reports, brochures and newsletters.

Philosophy

- Study fundamental beliefs, look at morals, politics, religion and the social sciences, logic and the philosophy of language.

Religious Studies

- Examine general and comparative religion, specific religious traditions, languages and modern studies involving philosophy and the social sciences.

Theology

- Study religious doctrines and their use by the community on a personal and interpersonal scale.

Interdisciplinary Studies

Cognitive Science

- Study the brain's cognitive processes and their effect on behaviour including perception, language, learning, memory, thought and comprehension
- Analyse and research the brain's problem-solving, reasoning and deductive abilities.

Comparative Literature And History Studies

- Examine literature under the conditions in which it was written.

Contemporary Studies

- Study the key forces for change in society to understand and prepare for future developments.

Indigenous Studies

- Examine aspects of Indigenous Australian societies, cultures and lifestyles, and the contemporary issues affecting Indigenous Australians.

Library Information Studies

- Operate recorded material systems, and acquire, circulate and maintain library materials.

Peace Studies

- Study post-conflict recovery processes including peacekeeping, non-violent action issues for reconciliation, and conflict resolution.

SOCIAL SCIENCES

Anthropology

- Explore the origins and development of human societies and culture by comparing communities.

Archaeology

- Discover the scientific and cultural study of prehistoric and historic civilisations, and reconstruct their technologies, adaptations and interactions.

Behavioural Sciences

- Explore aspects of human behaviour in a variety of environments.

Chaplaincy

- Help meet spiritual, religious and ethical needs in practical and pastoral ways.

Community Welfare And Human Services

- Analyse social issues in a community environment and implement procedures to support individuals and groups to overcome difficulties and life changes.

Counselling

- Foster wellbeing through personal growth, assistance after grief and loss, and support for people resolving crises and life problems.

Geography

- Study environmental, urban, rural, economic, social and political issues.

Organisational Behaviour

- Apply psychology in the workplace to produce an efficient and effective workforce working in a safe and motivated environment.

Psychology

- Study behaviour and mental processes to solve problems in health and education.

Social Work

- Help with social problems such as poverty, substance abuse, homelessness, conflict, discrimination and

inequality.

Sociology

- Examine the economy, social institutions, education, family, industrial relations, political system and culture in contemporary society.

Youth Studies

- Consider the sociological, psychological and cultural worlds of young people. Work with children and young people.

INFORMATION TECHNOLOGY

Ai And Machine Learning

- Create intelligent machines that can simulate human thinking and behaviour
- Design and develop machine learning algorithms and deep learning systems that allow machines to learn from data.

Communication Technology

- Cover the hardware and software protocols for different communication media, and software for building secure applications.

Computer Science

- Study programming languages, computing and computing systems, including information structure and software design.

Computer Systems Engineering

- Develop computer technology, including hardware and software such as microprocessors, machine level programming, networks, communication infrastructures and control systems.

Cyber Security

- Work with organisations to protect computers, networks and data from cyber attacks
- Plan and analyse proposed solutions for threats, vulnerabilities and risks and contribute to building security controls.

Data Science And Analysis

- Design data modelling processes to create algorithms and predictive models and perform custom analysis
- Manipulate large data sets and use them to identify trends and inform strategic business decisions.

Information Environments

- Design network systems that groups use to help an organisation operate properly
- Ensure staff have access to needed information, and allow distributed groups to work together.

Information Management/Science

- Plan organisational information systems that cope with diverse information needs, manage and rationalise information processes
- Organise information from any source and ensure the cost effectiveness of information technology.

Information Systems

- Manage effective, integrated information systems for organisations. Learn database design and management, and understand the environment in which organisations operate.

Interactive Media And Game Development

- Combine advanced animation techniques and computer programming skills to create interactive design, video games, computer games, new digital media, films and virtual reality.

Network Security

- Manage computing and networking devices to allow reliable, private and confidential communication for sharing of data and resources
- Understand computer system operation, administration tools, security techniques, resource management, security administration, and policy.

Networking

- Maintain computing devices using wired and wireless networks and networking devices, including network linking, developing new systems and providing services on networks.

Robotics Engineering

- Build, test, configure and troubleshoot robots and robotics systems
- Research and design processes for operating robotics systems.

Software And App Development

- Design, test, apply and evaluate software and apps for computers, mobile phones, and tablets
- Write and apply code to modify and improve software programs.

User Experience

- Evaluate user interfaces, graphics, information architecture, usability, accessibility and human-computer interaction to improve customer interactions and the user experience.

LAW

Barrister

- Perform the majority of advocacy work in the superior courts and provide specialist advice.

Criminology And Criminal Justice

- Examine crime and the criminal justice system, including police studies, public security, corrections, crime analysis and prevention and youth justice.

Law

- Gain knowledge of the common law system, acts of parliament, court decisions, and principles of law
- Use and interpret words and terms, find the law by intelligent and informed reading, think through legal issues, and express and communicate legal ideas in speech and writing.

Paralegal/Legal Studies

- Study the legal system at a level not leading to admission as a barrister or solicitor.

Solicitor

- Draw up agreements, contracts and other legal documents, act as executors for estates of deceased persons and advise clients about the present state of the law in particular areas
- Bring a case to court, and argue a case in court or 'brief' a barrister to appear on their client's behalf.

PRIMARY INDUSTRIES AND ENVIRONMENT

Agribusiness

- Apply business skills to agricultural settings, including the manufacture of farm supplies, farm production processes, and the storage, processing and marketing of farm commodities.

Agricultural Economics

- Analyse resource management, marketing, international trade and government policy in the primary sectors, including agriculture and national resource industries.

Agricultural Or Rural Science

- Study the physical, biological, technological, environmental and social factors affecting the production, processing, marketing, and distribution of food and fibre
- Develop the research skills needed for problem solving in rural industries and environmental areas.

Agronomy

- Examine the efficient and sustainable use of broad acre food and fibre crops such as wheat or cotton. Analyse their environmental impact and the use of native and introduced plants for conservation purposes and animal food.

Animal Studies

- Study the health, breeding, nutrition, and production aspects of domestic animals, the use of animals for recreational purposes and the biology of Australia's unique wildlife.

Aquaculture

- Study commercial aquatic plant and animal farming practices.

Ecotourism

- Explore the management and recreational use of natural areas, modified landscapes, wildlife habitats, and places of ecological interest
- Learn specific environmental regulations and the environmental impact of tourism on different ecosystems.

Environmental Management

- Manage the interface between business, management and environmental science.

Environmental Modelling

- Make predictions of environmental systems, especially where environmental impacts are assessed
- Construct models using mathematical, statistical and simulation techniques as well as computer systems, then manipulate the models to address hypothetical outcomes.

Environmental Science

- Study an area concerned with the chemical, physical and biological aspects of the environment and its relationship with humans.

Equine Studies

- Follow a career in businesses and activities that involve horses, including vet, manager of a horse stud, horse trainer or horse riding instructor.

Fisheries

- Study marine organisms and their environment, fish populations, the catch's management and behaviour, or the engineering and ecological aspects of catching systems.

Food Technology

- Examine the management of foods from raw harvest, through production, storage and distribution to the consumers
- Optimise food quality and quantity, with safety and nutritional value of foods as a primary objective.

Forestry

- Manage plantation and native forests as sustainable resources for purposes including timber production, tourism, nature conservation and bee-keeping.

Horticultural Technology

- Study the production of intensively managed crops such as fruits, vegetables, nuts, spices, cut flowers, foliage and nursery crops
- Develop and manage parks and recreation facilities, with both outdoor and indoor landscapes.

Land/Water Resource Science

- Analyse, manage and conserve natural resources
- Manage and conserve aquatic resources
- Cover the sustainable development, conservation and management of coastal or aquatic resources
- Study how natural ecosystems can be used for food, relaxation and recreation.

Nature Conservation And Wildlife Management

- Manage landscapes and wildlife within a social, economic and scientific framework.

Plant/Crop Protection

- Fight the insects, weeds and plant diseases that affect food and fibre production.

Rural Management

- Undertake professional, technologically-based training in agriculture or horticulture that is strongly management-oriented.

Rural Technology

- Combine knowledge of animal and plant production, agricultural mechanisation, soil and water conservation, and plant protection with their economic and environmental aspects.

Soil Science

- Focus on the scientific study of soil systems, including testing, classifying and mapping of soil and its surrounding area
- Conserve and manage soil in agricultural and urban settings and the natural environment, and develop and implement research programs to ensure the preservation of soil systems.

Sustainability Studies

- Identify and implement the best solutions for tackling problems in a socially just and environmentally sensitive manner, while maintaining acceptable standards of living.

SCIENCES

Aviation And Nautical Sciences

Aviation

- Work as a pilot, flight instructor or in other aerial services including agricultural spraying, aerial surveying and photography
- Develop knowledge of the business aspects of the air transport industry including airport management and managing aircrew resources.

Nautical Science

- Study the knowledge needed for a deck officer in a merchant navy environment, including the fields of navigation, ship management, marine surveying and nautical knowledge.

Biological Sciences

Anatomy

- Examine the structures of living animals and plants, or any of their parts.

Biochemistry

- Study the chemical processes that occur in living organisms, including the properties of the chemical constituents of living matter and of compound produced by living matter.

Biology

- Study and research living things and their relationships to one another, as well as to the physical environment. Biology is divided into zoology and botany.

Botany

- Cover all aspects of plant science: why plants grow where they do, how they grow, and the effect of nature, animals and humans on them.

Microbiology

- Study microscopic organisms and their medical, veterinary, industrial and environmental uses.

Parasitology

- Study parasitic animals, the diseases they cause, and the nature of the host-parasite relationship.

Pharmacology

- Learn about the science of drugs, their preparation, uses and effects
- Understand the chemical substances that modify physiological function.

Physiology

- Study the body fluids, cells, tissues and organs, and the way in which these individual parts are integrated.

Zoology

- Investigate animal life from its single-celled form to large animals and their structure, function, behaviour and ecology.

Earth Sciences

Archaeology

- Study human origins, evolution, and prehistoric and historic societies and their activities by analysing artefacts, buildings and shipwrecks.

Earth Resources

- Learn about the distribution of elements in the solid earth, hydrosphere and atmosphere, and the principles governing their migration
- Cover geology, chemistry, mining and exploration, geochemistry and environmental science.

Earth Science

- Undertake studies in solid earth, the hydrosphere and the atmosphere, including the Earth's properties and the natural processes that act on both its surface and its interior
- Apply chemistry, physics, mathematics, computing or biology to Earth systems.

Geography

- Study environmental, urban, rural, economic issues, particularly the regional patterning of natural resources, their development and associated human impact.

Geology

- Study geology, chemistry, geochemistry and other sciences to identify the materials, chemistry, structure and landforms of the Earth.

Geophysics

- Look at the Earth's interior, studying such physical properties as seismic waves, heat flow, gravity and magnetism.

Hydrology

- Explore the science of the movement, distribution and quality of water on the land or under the Earth's surface.

Marine Science

- Combine marine biology, oceanography, marine

geoscience and environmental management to study the marine environment

- Investigate and manage human impacts on the marine environment and marine resources.

Meteorology

- Forecast the weather and study the physics and dynamics of the atmosphere, climate and weather patterns
- Study specific climate change and investigate the most efficient methods of analysing and forecasting atmospheric conditions
- Analyse and interpret atmospheric data relating to weather conditions, research and develop new theoretical concepts.

Oceanography Sciences

- Explore the origin of ocean basins, tides, waves, currents and their physical interactions, the chemistry of seawater and life in the oceans, productivity and habitats.

Environmental Sciences

Air, Land And Water Science

- Assess, evaluate and manage the degradation, rehabilitation and conservation of atmosphere, land and water systems
- Assess and attempt to minimise the impact of agricultural, rural and urban developments on air, soil and water systems.

Coastal Management

- Monitor coastal habitats and water quality in estuaries and inshore areas, particularly marine ecosystems, coastal ecosystems, aquatic ecosystems and coastal protected areas
- Restore and repair critically damaged areas.

Ecology

- Study how living organisms interact with their environment. These environments range from the individual to the community and the ecosystem itself.

Interdisciplinary Biological Areas

Biotechnology

- Use knowledge from a range of scientific disciplines including molecular biology, genetics, biochemistry, microbiology and immunology to create new products
- Cover activities including fermentation technologies for plant and animal cells and waste remediation.

Computational Biology

- Use computing to manage large biological datasets and use this information and mathematical sciences to understand biological processes
- Span the full range of biological investigation from the analysis of molecular structure and function to the modelling of systems such as ecosystems.

Drug Design And Development

- Design new pharmaceutical chemicals through successive stages of synthesis, testing, formulation and large-scale production.

Food Science, Nutrition And Technology

- Cover the fundamental physical, chemical and biochemical nature of foods and the principles of food processing
- Develop, research, select, process and distribute safe, wholesome, nutritious and appealing foodstuffs
- Write food standard guidelines.

Wine Science

- Learn about wine, brewing and food processing industries
- Work in wineries, production management, quality control, and research and development.

Mathematics And Statistics

Mathematics

- Work with governments or large corporations to solve business and social problems, and to keep their technology, management methods and specialist products ahead of rivals
- Work in universities and research organisations conducting pure or applied mathematical research.

Statistics

- Solve problems for which no theory can make exact predictions, forecast for decision-makers or conduct operational research to improve efficiency for managers
- Design experiments and analyse data in biological, medical, scientific, sociological, business management, marketing and financial analysis.

Medical Sciences

Biomedical Science

- Investigate the relationship between humans, health and disease using knowledge from a number of disciplines including chemistry, physics, mathematics and biochemistry.

Medical Laboratory Science

- Acquire the skills needed in clinical laboratories to perform tests and procedures that are used to diagnose disease, disorders and ailments
- Set up and maintain equipment, prepare slides and collect blood samples.

Forensic Science

- Study disciplines that emphasise the presentation of medical evidence in criminal cases, including molecular biology, chemistry, physics, and pathology.

Genetics

- Study genes and their effects to understand the process of heredity and variation in living organisms, and to discover how genetic material works
- Use genetic knowledge in teaching, genetic counselling, clinical laboratories, forensics and public policy.

Human Movement Science

- Understand how and why human movement occurs, the adaptations to movement occurring with training, and changes in movement resulting from disorders,

maturation and ageing

- Study biological perspectives on human movement to provide a basis for a range of professions in the areas of sport and exercise science, health promotion, and health and physical education.

Neuroscience

- Study the nervous system, including the brain, spinal cord and neural networks controlling functions such as breathing, vision, hearing, learning and behaviour
- Understand human emotion, thought and behaviour, how the nervous system develops and functions, and neurological and psychiatric disorders.

Sport Science

- Assess and analyse the human body's performance in daily life, leisure and recreation activities, and in athletic pursuits
- Maximise body performance using analysis.

Physical And Veterinary Sciences

Chemistry

- Choose from study areas such as carbon compounds, metal and non-metal compounds, using mathematical methods to study chemicals and analytical chemistry.

Industrial Chemistry

- Learn chemical principles including the buying, processing and analysis of raw materials, and the nature of reactors and their control
- Understand the chemistry of industrial processes, operate and improve chemical plants, undertake quality control of products.

Instrumentation

- Apply physics to the design and construction of high technology tools in industries that seek to develop the next generation of technology.

Materials Science

- Develop new materials and study existing ones including metals, minerals, glasses and ceramics, synthetic and natural polymers
- Understand the importance of materials in scientific uses such as forensic investigation or in assessing the condition of existing structures.

Physics

- Explore the fundamental properties of the universe and the laws that govern their behaviour
- Specialise in areas including mechanics, relativity, nuclear physics, optics, microprocessors, geophysics, measurement and instrumentation.

Veterinary Science

- Study the production, husbandry and care of animals in health and disease. These may be food animals, companion animals and animals in their native environment
- Work in private practice, government departments, universities, research institutes, wildlife and conservation or developing countries where animal agriculture is vital.

COURSE ENTRY REQUIREMENTS

If you want to go to university or TAFE, you'll need to meet the entry requirements for the course or courses you're interested in to be considered for a place. Entry requirements are set by the institution offering the course, and consist of **eligibility** and **merit**.

ELIGIBILITY

Eligibility comprises prerequisites and institution admission rules.

PREREQUISITES

Depending on the course, prerequisites can include Year 12 subjects, interviews, portfolios and auditions. You can find prerequisites for courses starting in 2027 on the following pages.

Subject prerequisites

To get into most courses, you must have studied and passed specific senior subjects.

The most common subject prerequisite is English (Units 3 and 4, C). To meet this prerequisite, you must have completed a General English subject at Units 3 and 4 level and attained a grade of C or better overall.

Not all courses have subject prerequisites. Instead, some courses have assumed knowledge and/or recommended study. If your course has assumed knowledge or recommended study, you can get in without having studied the subject. However, you'll probably find you're better off if you have studied it, because the institution will assume, or recommend, that you have the subject knowledge.

OTHER PREREQUISITES

Some courses — creative and performing arts programs,

for example — have interviews, portfolios or auditions that you must pass to get in. Other courses may have a prior study prerequisite, meaning you need to complete another course, like a diploma or bachelor's degree, before you can gain entry.

INSTITUTION ADMISSION RULES

Institution admission rules apply to everyone who wants to study at a particular institution. Common institution admission rules include:

- English language proficiency — if English is not your first language, you must demonstrate you can speak, write, read and comprehend English to a standard set by the institution. Visit qtac.edu.au/englishlanguage-proficiency for information on institution English language proficiency requirements.
- Age requirements — for some institutions, you need to be a certain age before you can study there. You can find institution age requirements on our website at qtac.edu.au/minimum-age-requirements.

MERIT

If you're eligible, you're considered for an offer based on merit (i.e. based on your ATAR). For some courses, achieving a minimum ATAR is enough to get an offer. For other courses, you need a better ATAR than other applicants to compete for a place and get in ahead of them. For a small number of competitive courses, like medicine or dentistry, you may need even more, such as results in certain subjects, or a minimum score in the University Clinical Aptitude Test (UCAT), for example. If the course you want to study doesn't need an ATAR for entry, you don't need to compete for a place and will simply receive an offer when offers are made.

HOW TO USE THIS COURSE GUIDE

This diagram shows you how course information is laid out on the following pages:

Name of the course.	Majors inform you what you could specialise in within the course.	Where the course is offered.	English (Units 3 and 4, C) is the most common prerequisite. Prerequisites are required for entry. In these tables, they will be the first listed subjects, not marked by a letter.		
Course Title	Majors	Location	Duration	Prerequisites (R = Recommended Study, A = Assumed Knowledge)	
Bachelor of Science	Biochemistry, biomedical science, chemistry, geology, zoology.	Brisbane	3F or 6P	English (Units 3 and 4, C) R = at least one science subject A = General mathematics	

Duration is the minimum number of years in which the course can be completed. **Mode** is the way a course is delivered.

F: full-time, P: part-time, X: external/online/distance ed, FL: flexible delivery, OL: Online

Assumed knowledge is not compulsory for entry.

Recommended study is not compulsory for entry.

Nathan	4F or 8P	R: Biology or Physics A: Any General or Applied English subject (Units 3&4, C), General Mathematics or Mathematical Methods (Units 3 and 4, C)
Bachelor of Engineering (Honours)	Civil engineering (Gold Coast, Nathan); electrical and electronic engineering (Gold Coast); electrical and renewable energy (Gold Coast); electronic engineering (Nathan); electronic and energy engineering (Nathan); environmental engineering (Nathan); mechanical engineering (Gold Coast, Nathan); mechatronics (Nathan). For software engineering, refer to B Software Engineering (Honours).	Nathan, Gold Coast	4F or 8P	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)

Bachelor of Advanced Engineering (Honours)		Nathan, Gold Coast	5F or 10P	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Aviation	Engineering: Electronic engineering; mechanical engineering.	Nathan	4F	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Business	Engineering: Civil engineering; electrical and electronic engineering (Gold Coast); electronic engineering (Nathan); environmental engineering (Nathan); mechanical engineering. Business: Asian engagement; behavioural science; business analytics; economics; employment relations; events; finance; human resource management; innovation and entrepreneurship; logistics and supply chain management; management; marketing; political science and international relations; real estate and property development; sport management; sustainable business; taxation; tourism and travel.	Nathan, Gold Coast	5F or 10P	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Computer Science	Engineering: Electrical and electronic engineering; mechanical engineering. Computer science: data science and artificial intelligence; software development.	Gold Coast	5F or 10P	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Data Science	Engineering: Civil engineering; electrical and electronic engineering (Gold Coast); electronic engineering (Nathan); environmental engineering (Nathan); mechanical engineering; software engineering.	Gold Coast	5F or 10P	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Environmental Science	Engineering: Civil engineering; electrical and electronic engineering (Gold Coast); electronic engineering (Nathan); environmental engineering (Nathan); mechanical engineering. Environmental science: ecology and conservation; environmental management; soil and water science; urban environments.	Nathan, Gold Coast	5F or 10P	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Industrial Design	Engineering: Mechanical engineering.	Gold Coast	5F or 10P	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Information Technology	Engineering: Civil engineering; electrical and electronic engineering (Gold Coast); electronic engineering (Nathan); environmental engineering (Nathan); mechanical engineering. Information technology: Data analytics and IOT; information systems and business analytics; networks and cyber security; software development (Gold Coast only).	Nathan, Gold Coast	5F or 10P	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Science	Engineering: Civil engineering; electrical and electronic engineering (Gold Coast); electronic engineering (Nathan); environmental engineering (Nathan); mechanical engineering. Science: applied mathematics; physics.	Nathan, Gold Coast	5F or 10P	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)
Bachelor of Industrial Design		Gold Coast	3F or 6P	A: Any General or Applied English subject (Units 3&4, C), General Mathematics or Mathematical Methods (Units 3 and 4, C)
Bachelor of Software Engineering (Honours)	Note: For other disciplines refer to Bachelor of Engineering (Honours).	Nathan, Gold Coast	4F or 8P	R: One of Physics, Chemistry or Specialist Mathematics A: Any General or Applied English subject (Units 3&4, C), Mathematical Methods (Units 3 and 4, C)
Diploma of Engineering/Bachelor of Engineering (Honours)	Refer to Bachelor of Engineering (Honours) for available majors in this degree. Explanatory notes

The diagram on page 28 explains how to read the course entries below.

Prerequisites: The prerequisite for entry to all TAFE Queensland courses offered through QTAC is completion of Year 12. Some courses have additional prerequisites, assumed knowledge, recommended study or other requirements as listed in the table below.

Additional entry information: For entry to some TAFE Queensland courses, applicants may be required to successfully complete certificate-level study (for example, Certificate III in Early Childhood Education and Care before progressing to the Diploma of Early Childhood Education and Care). For more information on TAFE Queensland entry requirements, visit tafeqld.edu.au.

Articulation pathways/dual awards: Many TAFE Queensland courses offer articulation pathways that enable a graduate of a course at TAFE Queensland to gain direct entry into another course of study at a different higher education provider, with pre-determined advanced standing and/or guaranteed entry. The articulation pathway may depend on electives, specialisation, location, mode of study, and semester intakes of the articulating university. Please refer to the current edition of the QTAC Guide to Further Study for approved TAFE Queensland/university articulation arrangements or enquire directly with the relevant university. All mandatory university admission and English language requirements must be met before university enrolment is finalised.

Bachelor of Science/Bachelor of Education (Secondary)	Applied mathematics; biochemistry and molecular biology; biomedical science; cell biology; chemistry; coastal and ocean science; computer science; earth science; ecology and conservation biology; genetics; geographical sciences; mathematics; microbiology; physics; plant science; psychology; zoology.	St Lucia	4F or 6P & 1F	Mathematical Methods (Units 3 and 4, C), non-academic entry requirements, refer to QTAC website, one of Chemistry, Physics, Biology, or Earth and Environmental Science (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Bachelor of Science component: Specialist Mathematics (Units 3 and 4, C) if majoring in mathematics. Specialist Mathematics and Physics (Units 3 and 4, C) if majoring in physics.
Engineering and Technology				
Bachelor of Engineering (Honours)	Aerospace engineering; biomedical engineering; bioprocess engineering; computer engineering; environmental engineering; geotechnical engineering; materials engineering; mining engineering; metallurgical engineering; structural engineering; transport engineering; water and marine engineering. Specialisations: chemical engineering; civil engineering, electrical engineering; mechanical engineering; mechatronic engineering; software engineering. Minors: Computing, data science, design.	St Lucia	4F or 8P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Arts	Engineering (Hons): Specialisations: chemical engineering; civil engineering, electrical engineering; mechanical engineering; mechatronic engineering; software engineering. Arts: Refer to Bachelor of Arts.	St Lucia	5.5F or 11P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Biotechnology	Engineering (Hons): chemical engineering. Biotechnology: Refer to Bachelor of Biotechnology.	St Lucia	5F or 10P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Business Management	Engineering (Hons): Specialisations: chemical engineering; civil engineering, electrical engineering; mechanical engineering; mechatronic engineering; software engineering. Business management: Refer to Bachelor of Business Management.	St Lucia	5.5F or 11P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)

Bachelor of Engineering (Honours)/ Bachelor of Commerce	Engineering (Hons): Specialisations: chemical engineering; civil engineering, electrical engineering; mechanical engineering; mechatronic engineering; software engineering. Commerce: Refer to Bachelor of Commerce.	St Lucia	5.5F or 11P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Computer Science	Refer to Bachelor of Engineering (Honours) and Bachelor of Computer Science. Note: The Bachelor of Engineering (Honours) Specialisation in Software Engineering, minors in Computing, Data Science, Design, and the Bachelor of Computer Science Extended Major in Data Science are not available in this dual program.	St Lucia	5.5F or 11P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Design	Engineering (Hons): Specialisations: chemical engineering; civil engineering, electrical engineering; mechanical engineering; mechatronic engineering; software engineering. Design: Refer to Bachelor of Design.	St Lucia	5.5F or 11P	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C), Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Economics	Engineering (Hons): Specialisations: chemical engineering; civil engineering, electrical engineering; mechanical engineering; mechatronic engineering; software engineering. Economics: Refer to Bachelor of Economics.	St Lucia	5.5F or 11P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Information Technology	Engineering (Hons): Specialisations: chemical engineering; civil engineering, electrical engineering; mechanical engineering; mechatronic engineering. Information technology: Refer to Bachelor of Information Technology.	St Lucia	5.5F or 11P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Mathematics	Refer to Bachelor of Engineering (Hons) and Bachelor of Mathematics.	St Lucia	5F or 10P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Bachelor of Science	Refer to Bachelor of Engineering (Hons) and Bachelor of Science.	St Lucia	5F or 10P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Bachelor of Engineering (Honours)/ Master of Engineering	Fields of Study: Chemical Engineering; Chemical and Biomedical Engineering; Chemical and Bioprocess Engineering; Chemical and Environmental Engineering; Chemical and Metallurgical Engineering; Civil Engineering; Civil and Environment Engineering; Electrical Engineering; Electrical and Biomedical Engineering, Electrical and Computer Engineering; Mechanical Engineering, Mechanical and Aerospace Engineering; Mechanical and Materials Engineering; Mechatronic Engineering; Software Engineering.	St Lucia	5F or 10P	Mathematical Methods (Units 3 and 4, C), one of Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics, Chemistry and Physics (Units 3 and 4, C)
Health and Recreation				
Bachelor of Clinical Exercise Physiology (Honours)		St Lucia	4F or 4P & 2F	one of Biology, Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)

Bachelor of Dental Science (Honours)		St Lucia, Herston	5F	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C), Chemistry (Units 3 and 4, C), University Clinical Aptitude Test (UCAT) R: Biology (Units 3 and 4, C)
Bachelor of Exercise and Nutrition Sciences/Master of Dietetics Studies	Note: The masters program is a combination of lectures on campus and at a health care facility.	St Lucia	3F & 1.5F	General Mathematics, Mathematical Methods or Specialist Mathematics (Units 3 and 4, C), one of Biology, Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Exercise and Sport Sciences (Honours)		St Lucia	4F or 7P & 0.5F	one of Biology, Chemistry or Physics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Health Sciences	Clinical health; nutrition; public health.	St Lucia, Herston	3F or 6P	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: one of Biology, Chemistry or Physics (Units 3 and 4, C)
Bachelor of Health Sciences (Nutrition)/Master of Dietetics Studies	Nutrition. Note: The undergraduate degree must be completed in three years full-time. The masters program is a combination of lectures on campus and placement at a healthcare facility and must be completed on a full-time basis.	St Lucia, Herston	3F & 1.5F	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: one of Biology, Chemistry or Physics (Units 3 and 4, C)
Bachelor of Health, Sport and Physical Education (Honours)	Note: The program can be studied part-time, but the final year must be commenced in semester 1 and taken full-time. Note: The Bachelor of Computer Science Extended Major in Data Science is not available in this dual program.	St Lucia	4F or 8P	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C), Mathematical Methods (Units 3 and 4, C) R: Specialist Mathematics (Units 3 and 4, C)
Bachelor of Computer Science/ Bachelor of Economics	Refer to the Bachelor of Computer Science and Bachelor of Economics.	St Lucia	4F or 8P	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C), Mathematical Methods (Units 3 and 4, C) R: Specialist Mathematics (Units 3 and 4, C)
Bachelor of Computer Science/ Bachelor of Science	Refer to Bachelor of Computer Science and Bachelor of Science. Note: The Bachelor of Computer Science Extended Major in Data Science and the Bachelor of Science minor, major or extended major in Computer Science are not available in this dual program.	St Lucia	4F or 8P	Mathematical Methods (Units 3 and 4, C), one of Chemistry, Physics, Biology, or Earth and Environmental Science (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Specialist Mathematics (Units 3 and 4, C)
Bachelor of Computer Science/ Master of Cyber Security	Cyber Security; data science; machine learning; programming languages; scientific computing. Fields of Study: Cryptography; cyber defence.	St Lucia	4FT or 8PT	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C), Mathematical Methods (Units 3 and 4, C) R: Specialist Mathematics (Units 3 and 4, C)
Bachelor of Computer Science/ Master of Data Science	Cyber Security; data science; machine learning; programming languages; scientific computing.	St Lucia	4FT or 8PT	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C), Mathematical Methods (Units 3 and 4, C) R: Specialist Mathematics (Units 3 and 4, C)
Bachelor of Information Technology	Software design; software information systems; user experience design. Minor: Computer systems.	St Lucia	3F or 6P	Mathematical Methods (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Information Technology/ Bachelor of Arts	Refer to Bachelor of Information Technology and Bachelor of Arts.	St Lucia	4F or 8P	Mathematical Methods (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Information Technology/ Bachelor of Design	Refer to Bachelor of Information Technology and Bachelor of Design.	St Lucia	4F or 8P	Mathematical Methods (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Information Technology/ Bachelor of Science	Refer to Bachelor of Information Technology and Bachelor of Science. Note: The Bachelor of Science minor, major or extended major in Computer Science is not available in this dual program.	St Lucia	4F or 8P	Mathematical Methods (Units 3 and 4, C), one of Chemistry, Physics, Biology, or Earth and Environmental Science (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) Bachelor of Science component: Specialist Mathematics (Units 3 and 4, C) if majoring in mathematics. Specialist Mathematics and Physics (Units 3 and 4, C) if majoring in physics.
Law				
Bachelor of Arts/Bachelor of Laws (Honours)	Refer to Bachelor of Arts. Students must take the arts component of the dual program in a field other than legal education studies.	St Lucia	5F or 10P	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Business Management/ Bachelor of Laws (Honours)	Refer to Bachelor of Business Management.	St Lucia	5F or 10P	General Mathematics, Mathematical Methods or Specialist Mathematics (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Commerce/Bachelor of Laws (Honours)	Refer to Bachelor of Commerce.	St Lucia	5F or 10P	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C), Mathematical Methods (Units 3 and 4, C)
Bachelor of Computer Science/ Bachelor of Laws (Honours)	Refer to Bachelor of Computer Science. Note: The Bachelor of Computer Science Extended Major in Data Science is not available in this dual program.	St Lucia	5F or 10P	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C), Mathematical Methods (Units 3 and 4, C) R: Specialist Mathematics (Units 3 and 4, C)

Bachelor of Economics/Bachelor of Laws (Honours)	Refer to Bachelor of Economics.	St Lucia	5F or 10P	Mathematical Methods (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Humanities (Western Civilisation)/Bachelor of Laws (Honours)	Western Civilisation.	St Lucia	5F or 10P	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Journalism/Bachelor of Laws (Honours)		St Lucia	5F or 10P	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Laws (Honours)		St Lucia	4F or 8P	English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Science/Bachelor of Laws (Honours)	Refer to Bachelor of Science.	St Lucia	5F or 10P	Mathematical Methods (Units 3 and 4, C), one of Chemistry, Physics, Biology, or Earth and Environmental Science (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C) R: Bachelor of Science component: Specialist Mathematics (Units 3 and 4, C) if majoring in mathematics. Specialist Mathematics and Physics (Units 3 and 4, C) if majoring in physics.
Primary Industries and Environment				
Bachelor of Agribusiness	Note: First year requires attendance at both St Lucia and Gatton campuses; subsequent years are based at Gatton campus.	Gatton, St Lucia	3F or 6P	General Mathematics or Mathematical Methods (Units 3 and 4, C), English, Literature, English and Literature Extension or English as an Additional Language (Units 3 and 4, C)
Bachelor of Agribusiness/Bachelor of Agricultural Science	Agronomy; animal science; horticulture. Note: The majority of courses are based at Gatton with some courses offered at St Lucia.
